

ForeSite

Comprehensive User Guide

Version 1.0

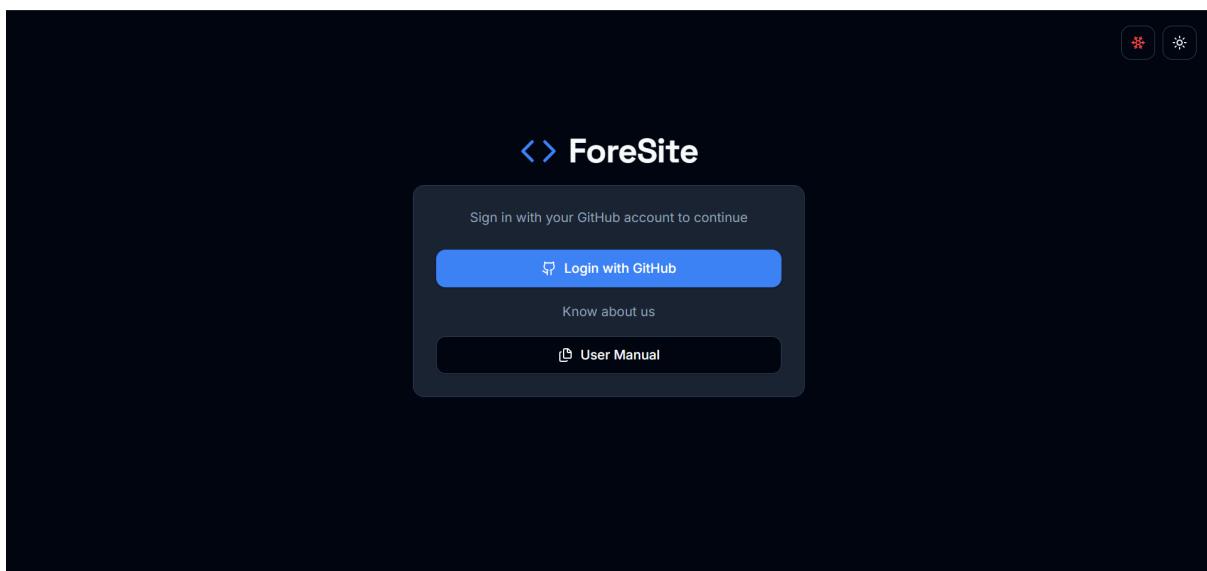

This guide provides a complete overview of every screen, feature, and data field in the ForeSite application.

1. Login Screen

The entry point to the application.

User Actions:

- Click "**Login with GitHub**" to authenticate via OAuth.
- Click "**User Manual**" to open the PDF documentation.
- Toggle **Theme** for specific visual effects.

2. Dashboard

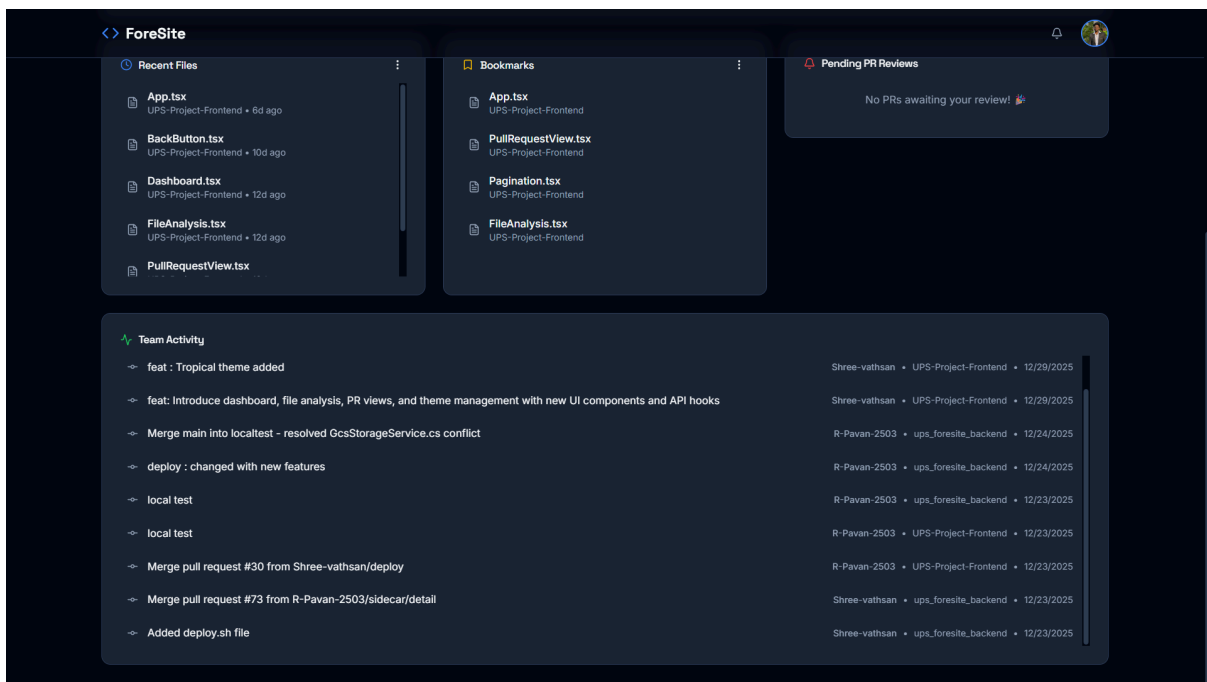

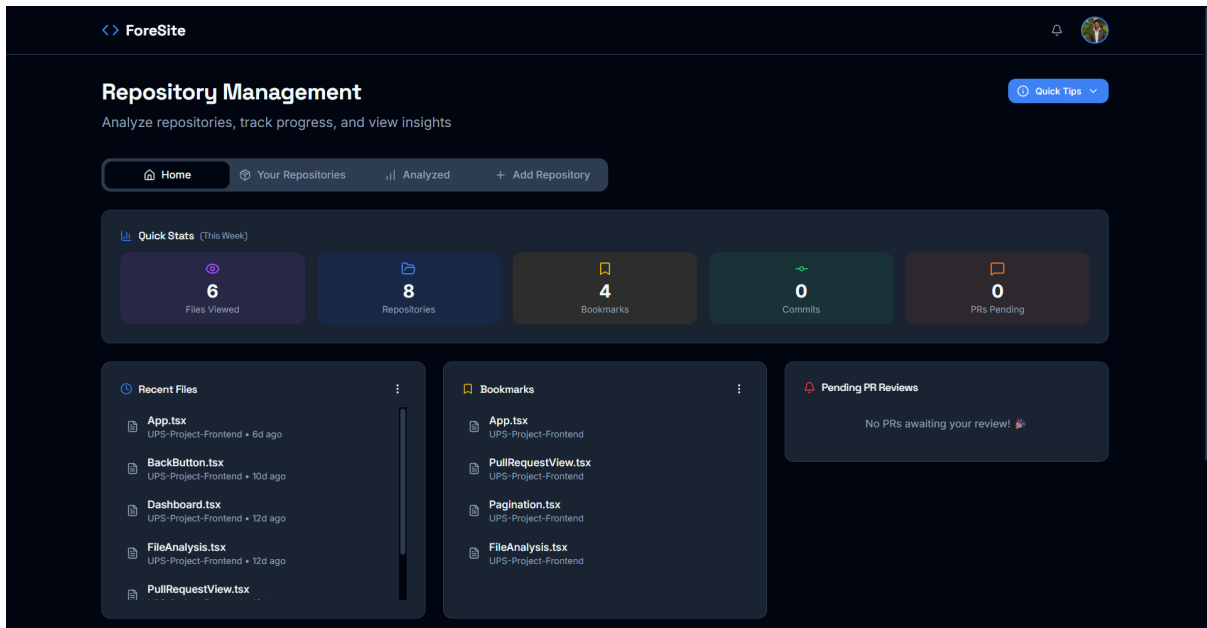

After logging in, you land on the Dashboard. This area is divided into four main tabs.

A. Home Tab (Overview)

A high-level summary of your activity.

Widgets Displayed:

1. **Quick Stats:** Summary of your total commits and active days.
2. **Recent Files:** List of files you recently viewed.
3. **Bookmarks:** Quick links to specific files you have flagged.
4. **Pending Reviews:** List of Pull Requests waiting for your attention.
5. **Team Activity:** A timeline or heatmap of your team's recent contributions.

B. Your Repositories Tab

Manage your connected repositories.

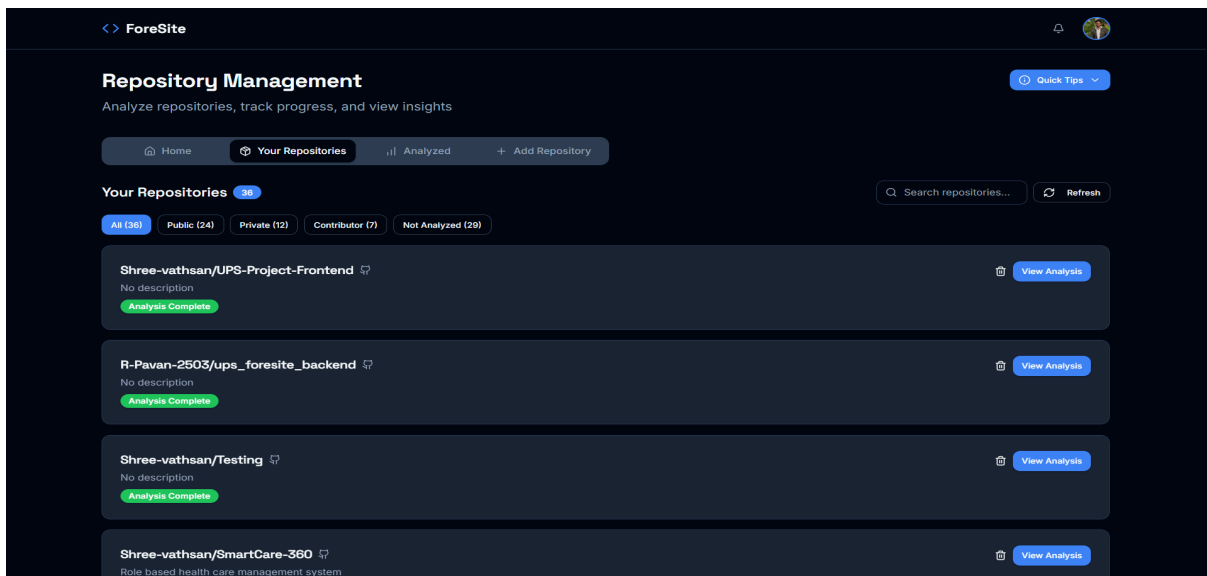

Interface Elements:

- **Search Bar:** "Search repositories..." filter.
- **Refresh Button:** Updates the list from GitHub.
- **Filter Buttons:** All, Public/Private, Contributor, Not Analyzed.

Repository Card Details:

- **Name:** Owner/RepoName.
- **Description:** From GitHub.

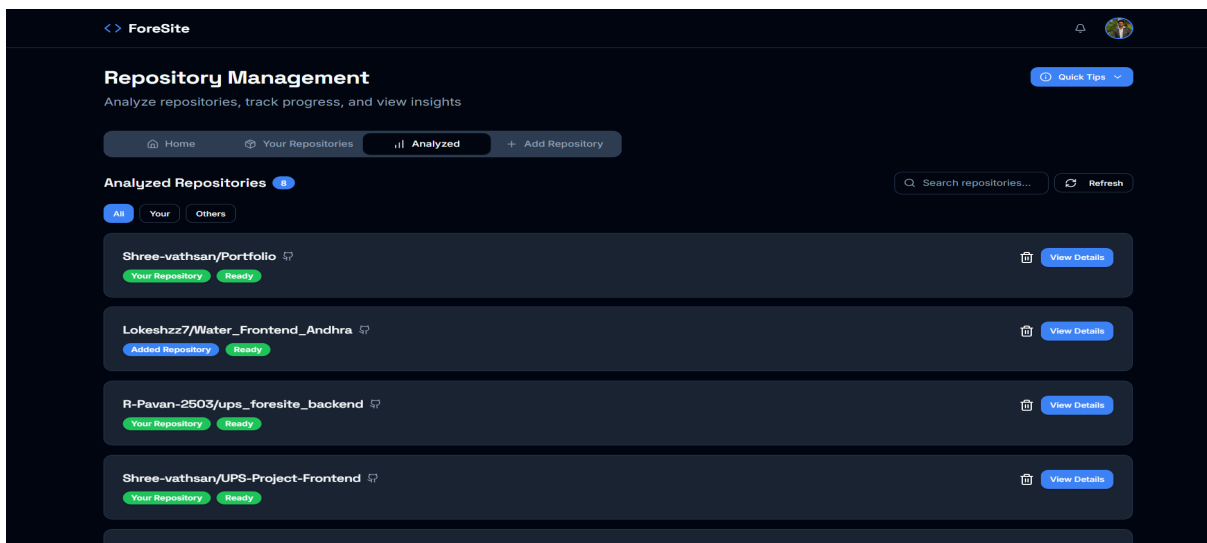

- **GitHub Link:** Icon to open in a new tab.
- **Status Badge:**
 - Analysis Complete (Green)
 - Analyzing... (Yellow/Warning)
 - Pending (Blue)
- **Action Buttons:**
 - **Analyze:** Starts the backend analysis process.
 - **View Analysis:** Opens the Repository View.
 - **Trash Icon:** Deletes the analysis data.

C. Analyzed Repositories Tab

A dedicated view for repositories that are ready to explore.

- Lists only repositories with **Status: Ready**.

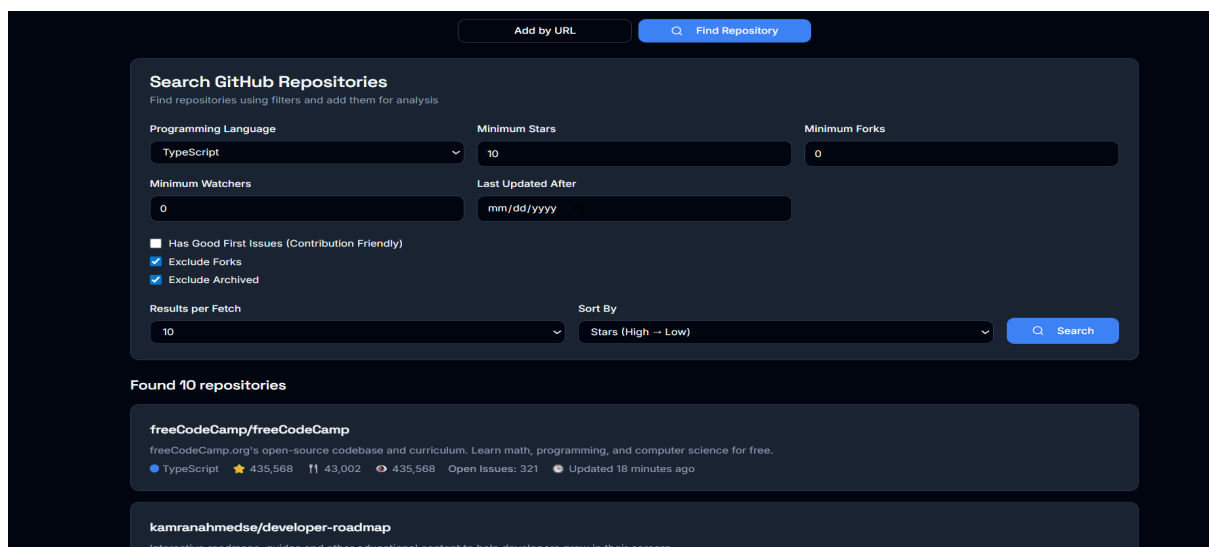

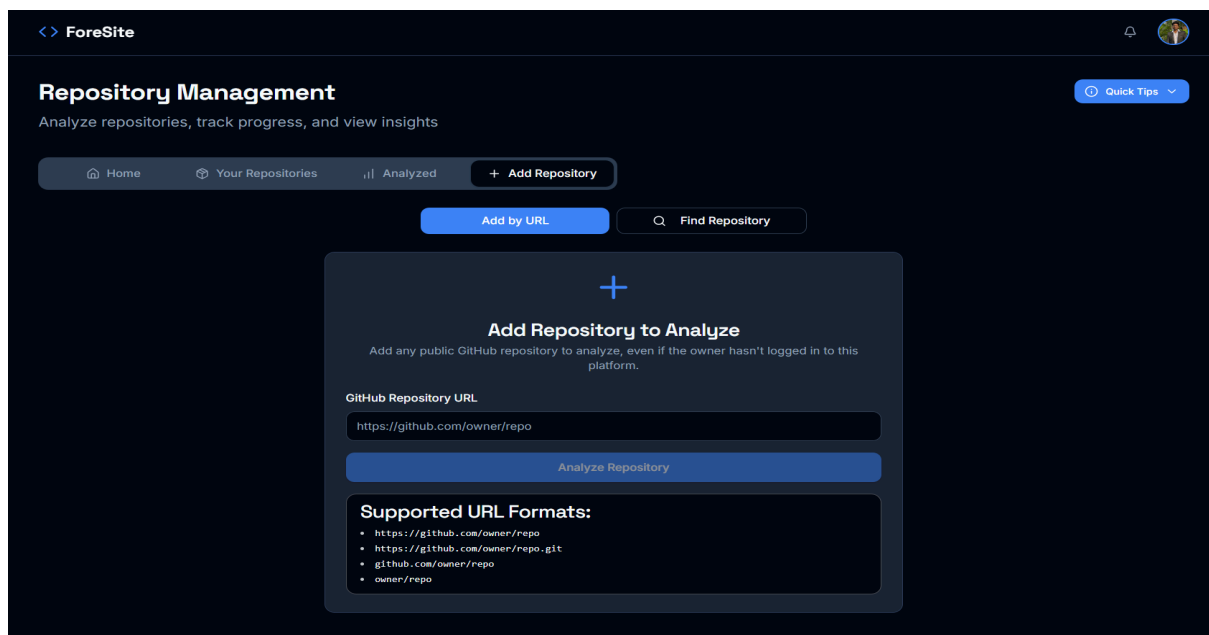

D. Add Repository Tab

Connect new codebases to ForeSite.

Sub-Features:

- **Add by URL:**
 - Input field: Paste a full GitHub URL.
 - Action: Press Enter or click Add.
- **Find Repository (GitHub Search):**
 - Search Filters: Language, Min Stars, "Has Good First Issues".
 - Results List: Shows matching repos from GitHub API.

3. Repository View (The Hub)

Access this by clicking "**View Analysis**" on a repository.

Header Area:

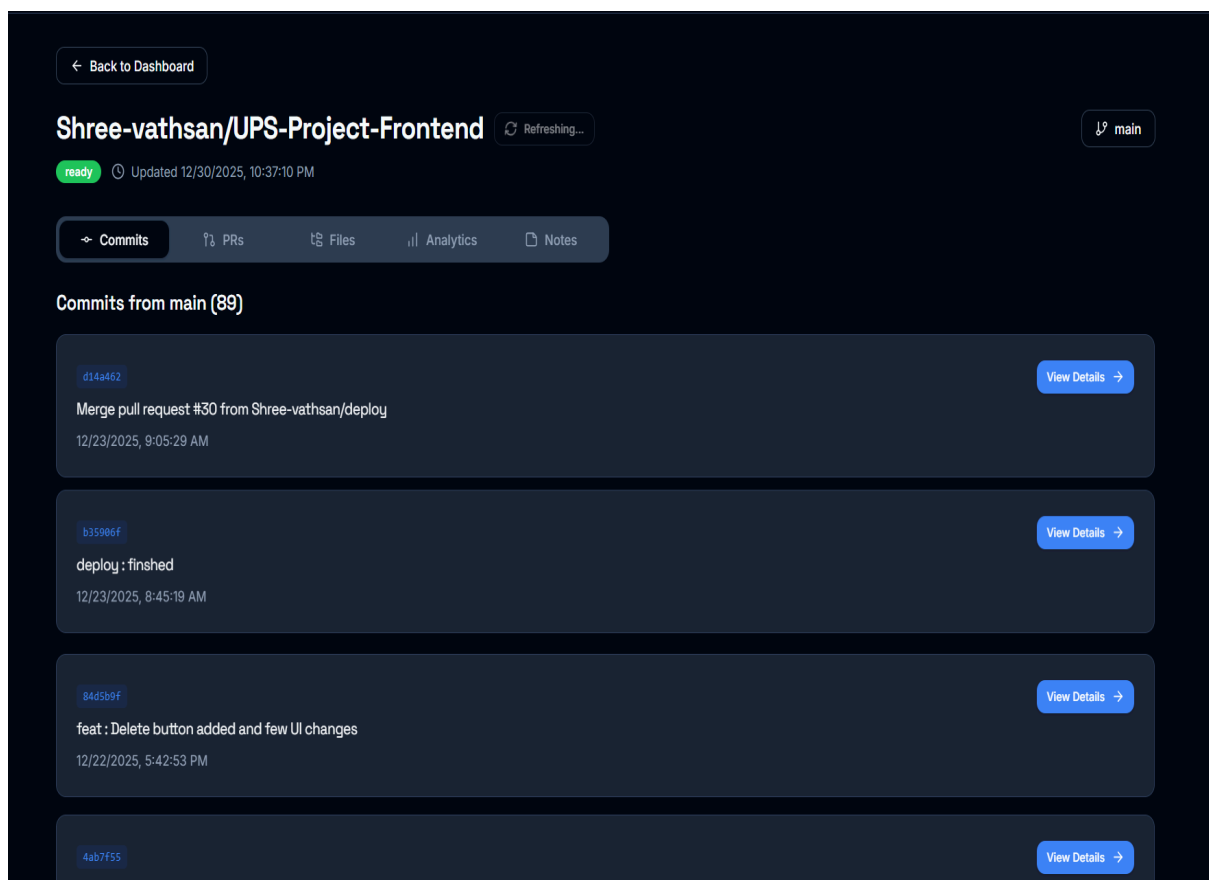

- **Title:** Repository Name.
- **Refresh Button:** Triggers a backend re-sync.
- **Last Updated:** Timestamp of the last successful analysis.
- **Branch Selector:** Dropdown menu to switch the active branch.

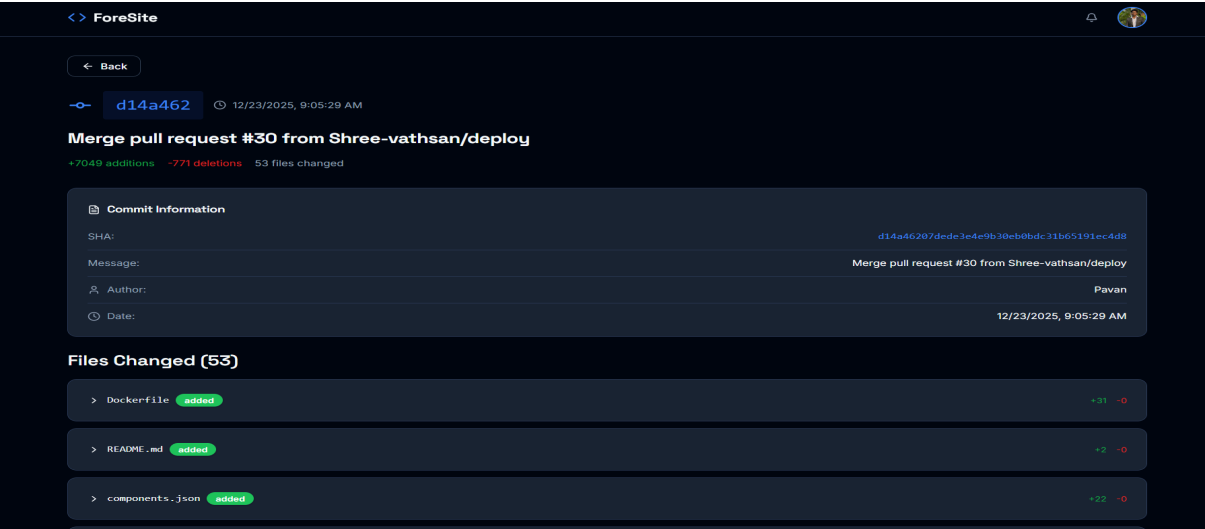

Navigation Tabs:

3.1 Commits Tab

Data Displayed:

- **Commit Hash:** First 7 characters.
- **Message:** The commit title.
- **Date:** When it was committed.
- **Actions:** "View Details" button.

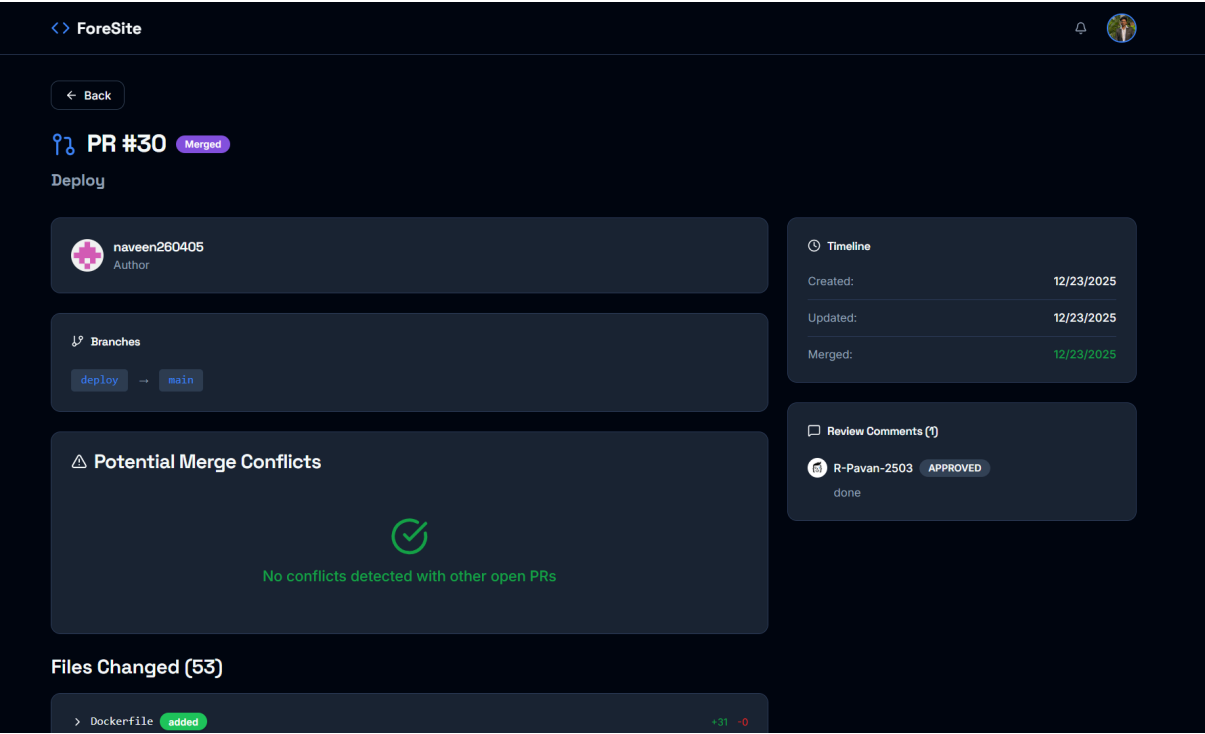

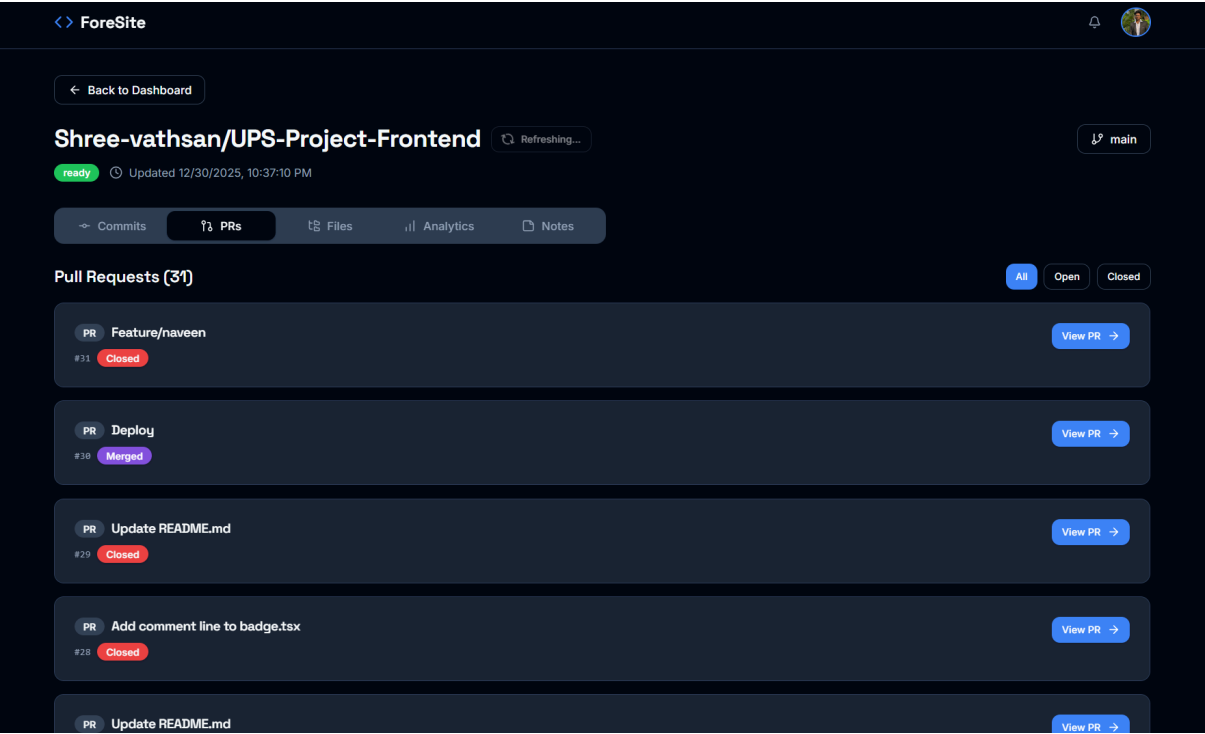

3.2 PRs (Pull Requests) Tab

Data Displayed:

- **Filters:** All / Open / Closed.
- **PR Card:**
 - Title & Number (e.g., #42).
 - Status Badge: Open (Green), Merged (Purple), Closed (Red).
 - Button: "View PR".

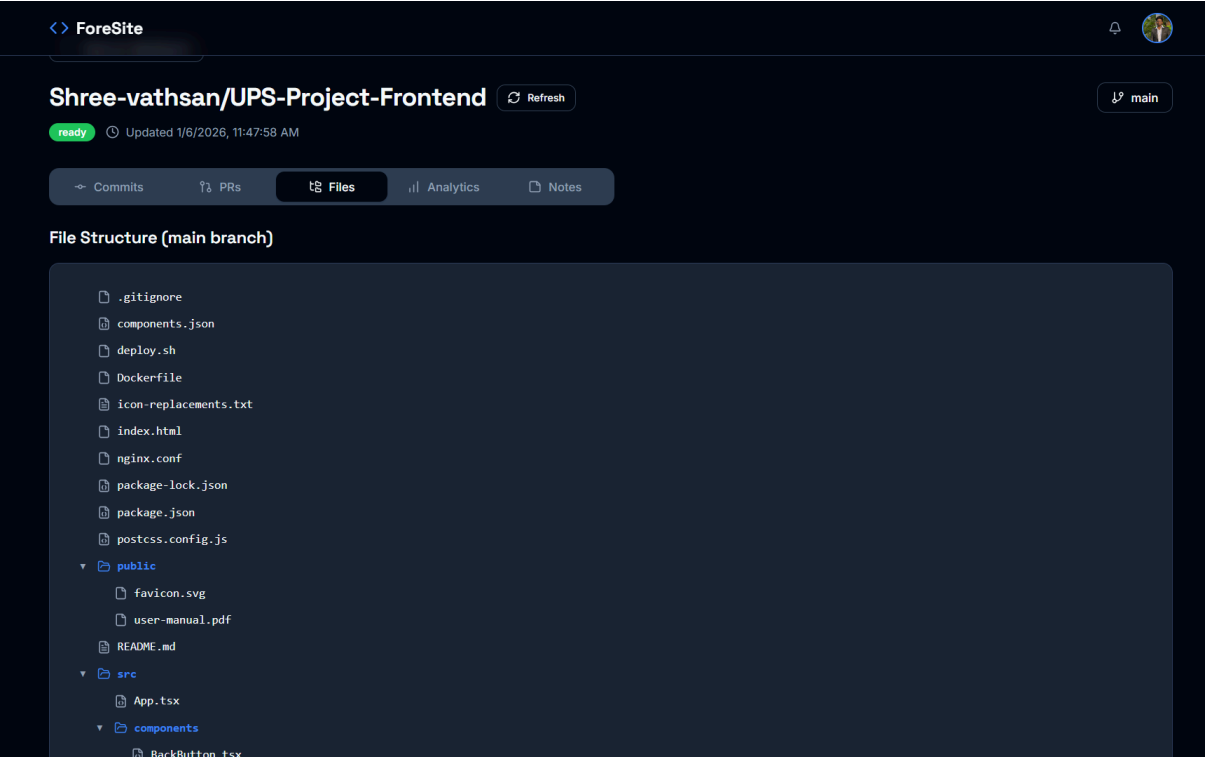

3.3 Files Tab

Data Displayed:

- **File Tree:** A hierarchical folder structure.
- **Interaction:** Click a file to open the File Detail View.

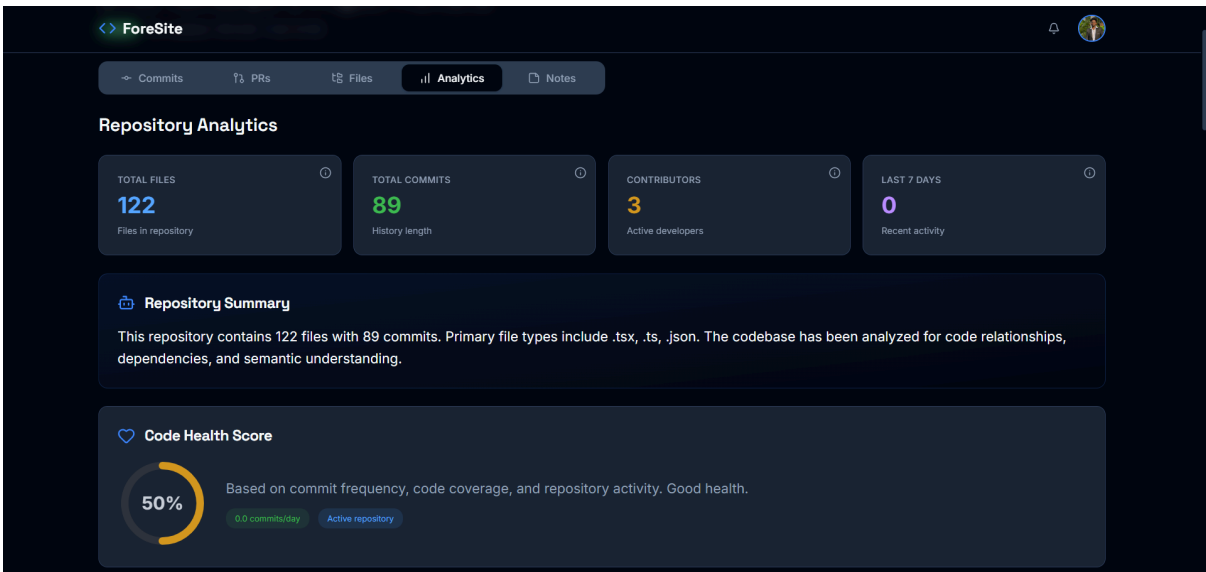

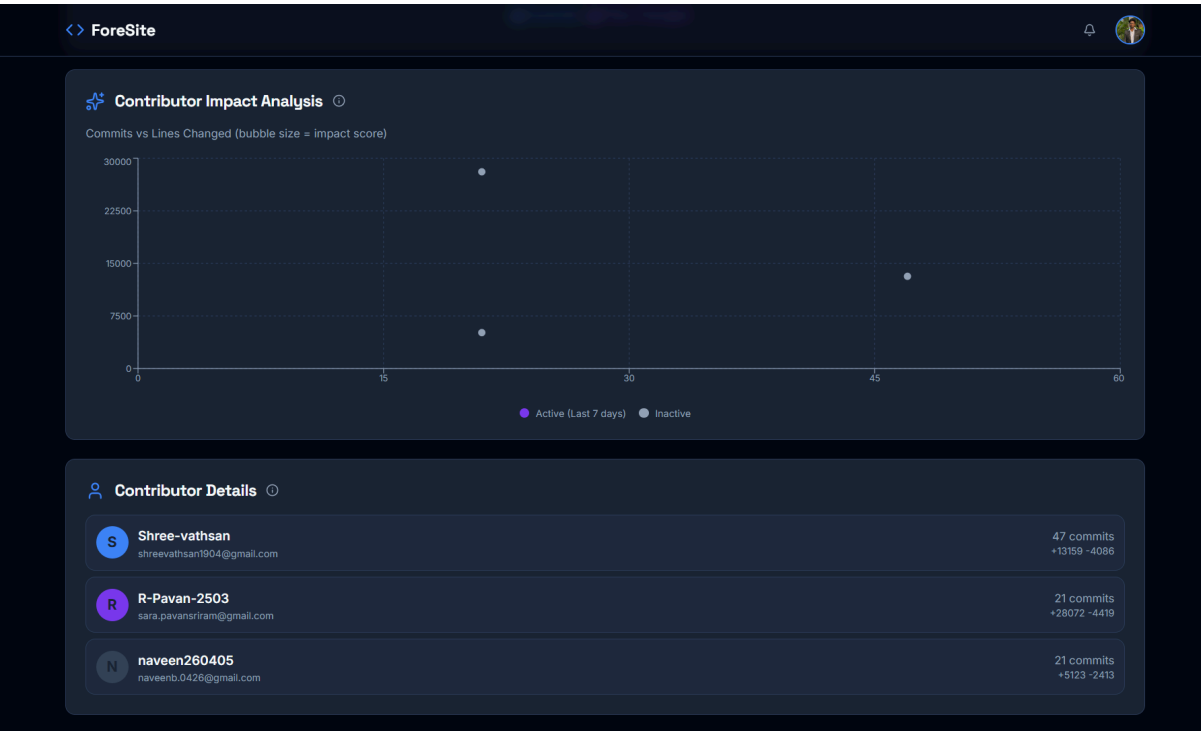

3.4 Analytics Tab (Team Insights)

This tab contains complex visualizations.

Visualizations:

1. **Team Metrics Cards:** Total Contributors, Active Contributors, Avg Commits.
2. **Collaboration Score:** A 0-100 donut chart indicating team health.
3. **Top Contributors Chart:** Bar chart comparing Commits vs Files Changed.
4. **Contributor Impact Analysis:** Scatter plot (Commits vs Lines Added).
5. **Contributor Details List:** Name, Email, Commits Count, Lines Added/Removed.

3.5 Notes Tab

A collaboration space for the team.

Sections:

- **Discussion:** A chat-like interface supporting @mentions.
- **Sticky Notes:** Create standalone notes tagged to specific branches.

4. File Detail View

Access this by clicking any file in the **Files** tab.

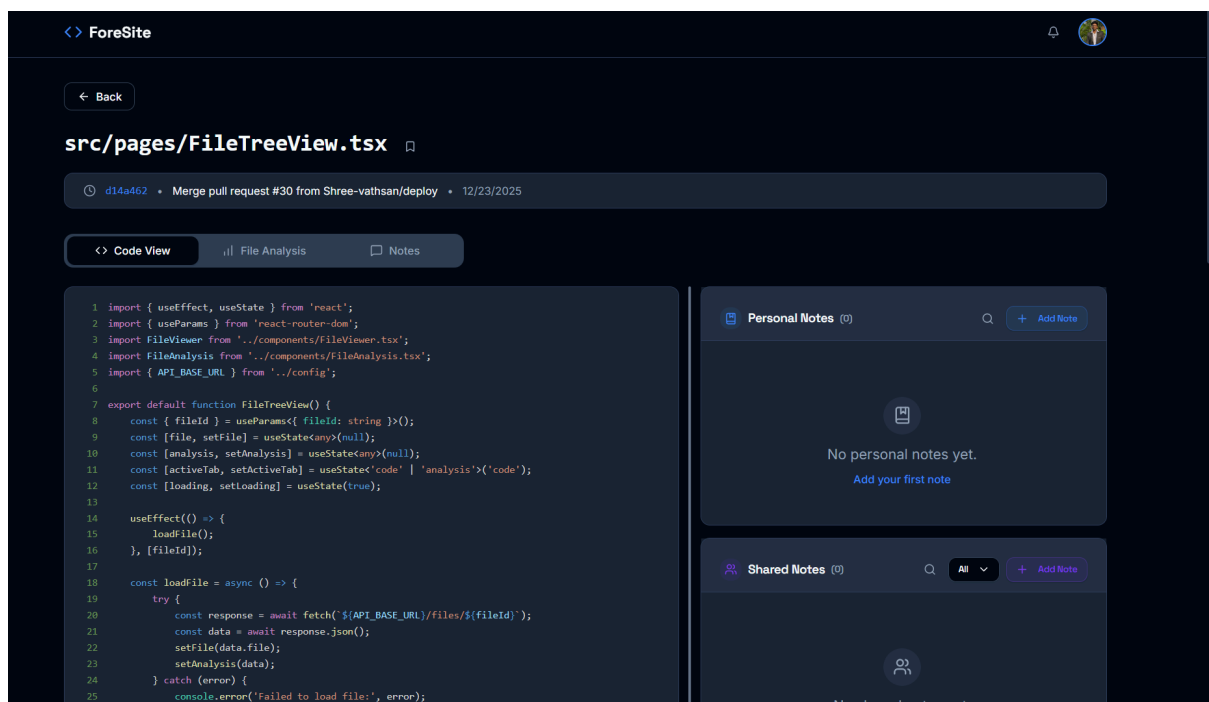

Header:

- **Filename:** Large title.
- **Line Count:** Total lines in the file.
- **Bookmark Button:** Icon to save for later.
- **Commit Info:** Shows the specific commit version being viewed.

Tabs:

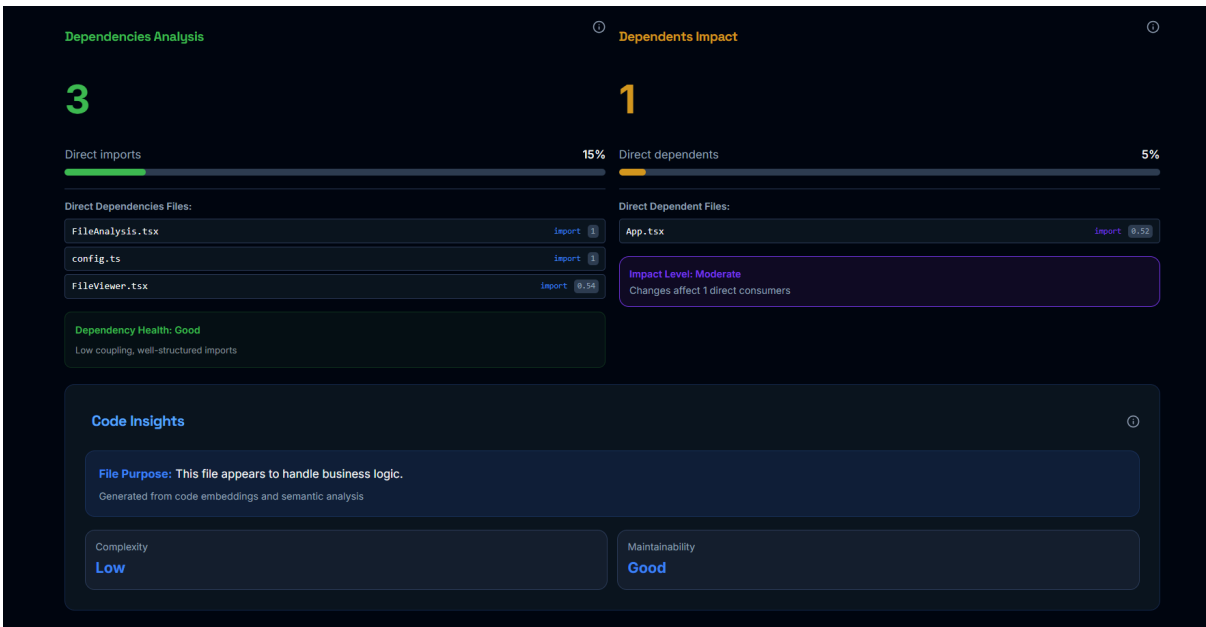

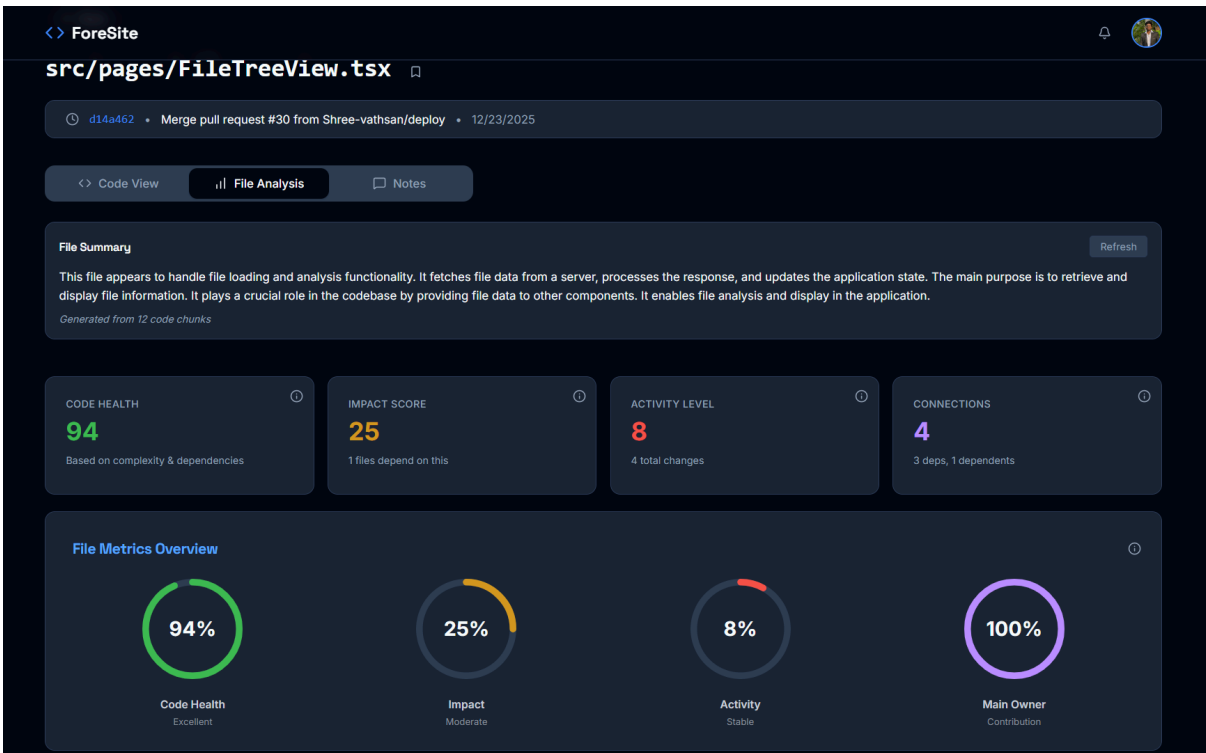

A. Code View

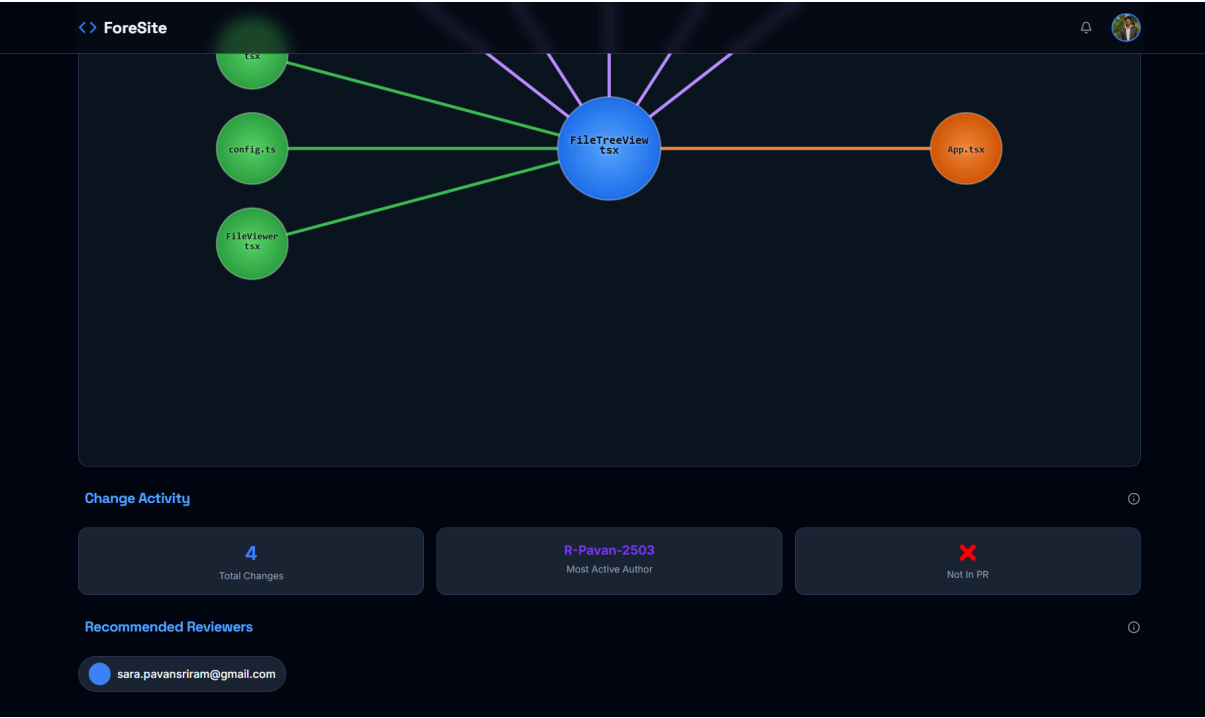

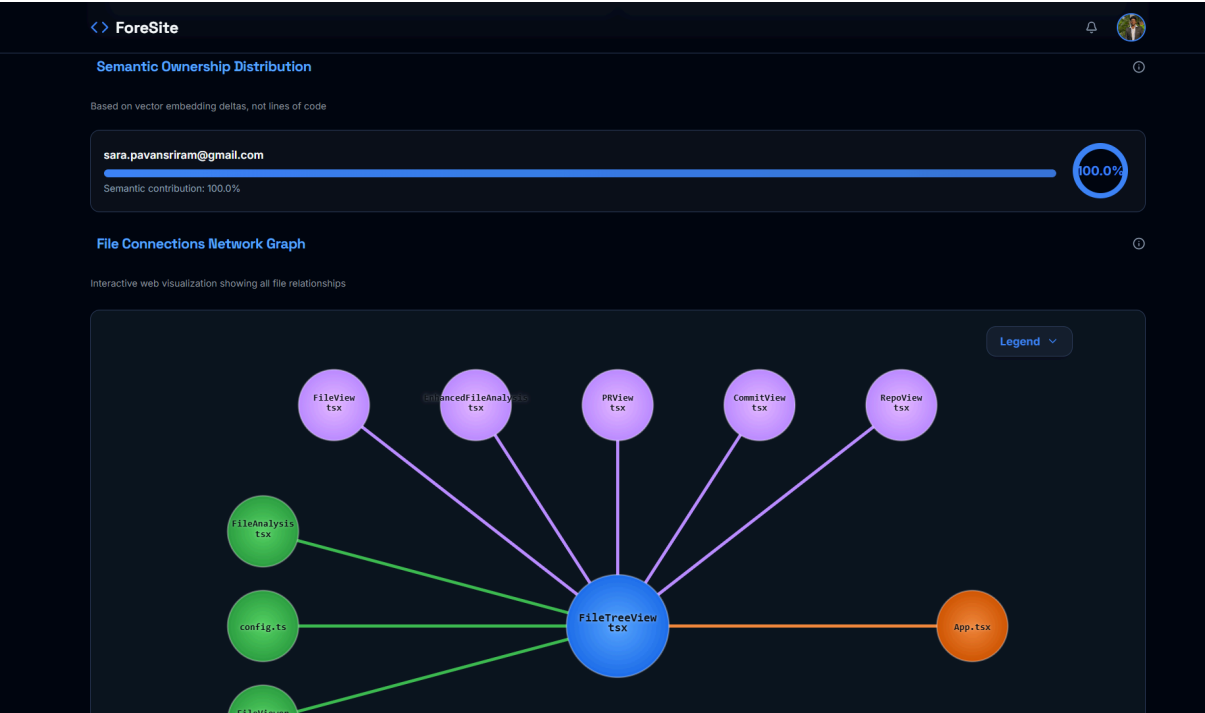

- **Split Screen Layout:**
 - **Left:** Syntax-highlighted source code with line numbers.
 - **Right:** Personal Notes Panel.
- **Navigation:** "Previous Commit" / "Next Commit" buttons.

B. File Analysis

- Displays complexity metrics and churn data (if available).

C. Notes

- File-specific team notes (separate from the global repository notes).
